Wireless Temperature and Humidity Sensor

General Description

The R718AB is a wireless communication device that detects ambient air temperature and humidity. R718AB can detect the temperature and humidity of the air and transmit the detected data to data center through the wireless network. It uses the SX1276 wireless communication module.

Principle of Operation

R718AB carries a built-in SHT-30 temperature and humidity sensor.

SHT-30 can detect environment temperature and humidity and module (R100H/R100L) communicate through I2C.

Features of NETVOX Sensors

- Apply SX1276 wireless communication module
- 2 section of ER14505 battery in parallel (AA SIZE 3.6V / section)
- Temperature and humidity detection
- The base is attached with a magnet that can be attached to a ferromagnetic material object
- Protection class IP65
- LoRaWAN™ Class A compatible
- Frequency Hopping Spread Spectrum (FHSS)
- Third-Party online wireless sensor monitoring and notification system to configure sensors, view data and set alerts via SMS text and email (optional)
- Available third-party platform: Actility/ThingPark, TTN, MyDevices/Cayenne
- Improved power management for longer battery life
